Project Proposal (Proposed Solution) template

This project proposal outlines a solution to address a specific problem. With a clear objective, defined scope, and a concise problem statement, the proposed solution details the approach, key features, and resource requirements, including hardware, software, and personnel.

Project Overview	
Objective	The objective of this model is to create a model that helps booking train and aeroplane tickets comfortably, accurately with discount rates using machine learning program
Scope	The project comfortably assets the ticket booking for train and aeroplane ,incorporating machine learning for accurate working.
Problem Statement	
Description	Adderassing the gliches faced in ticket booking which affects the customer satisfaction.
Impact	Solving this issues and gliches results in smooth working of our system and a better way to increase efficiency and customer review in a positive manner.
Proposed Solution	
Approach	Employ machine learning engineers and chat gpt and ai experts that helps in a craftsmanship of the application
Key Features	Requires a professional machine learning engineers,skilled crafters and a expert in ai and chat gpt

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	Intel core i5 14 gen+nvidia rtx 5090
Memory	RAM specifications	e.g., 16 GB

Storage	Disk space for data, models, and logs	e.g., 1 TB SSD
---------	--	----------------

Software		
Frameworks	Python frameworks	e.g., Flask
Libraries	Additional libraries	e.g., tensorflow
Development Environment	IDE, version control	e.g., Jupyter Notebook, Git
Data		
Data	Source, size, format	e.g., Kaggle dataset, 10,000 images
